# Grant Applications

Partner with the AGCO Agriculture Foundation to transform lives in farming communities and support next-generation leaders to develop innovative solutions for agri-food systems. Grantmaking is one way the Foundation forges partnerships with nonprofits to implement impact-driven initiatives for a food-secure world. Over the years, we have awarded 35 grants to support programs around our thematic focus areas.

# Special Track on Network Medicine (NM)

In the era of precision medicine, the increasing complexity of biological systems and the multi-factorial nature of diseases demand innovative approaches for understanding human health and pathology. Network Medicine is a burgeoning field that addresses this challenge by integrating principles of network theory with molecular biology, clinical data, and systems biology. By mapping the interactions between genes, proteins, metabolites, cells, and environmental factors into network models, this approach enables researchers to explore how disruptions in these complex networks lead to disease and how they can be targeted for therapeutic intervention.

This special track aims to create a platform for discussion, collaboration, and knowledge exchange among researchers, clinicians, and professionals at the forefront of Network Medicine. It will focus on recent advances in understanding the molecular networks that underpin diseases and will explore how these insights are being translated into clinical applications.

## **Topics of interest**

Example areas include but are not limited to:

- Network-Based Disease Classification
- Network-Based Drug Discovery
- Multi-Omics Integration in Network Medicine
- Disease-Disease Networks
- Gene and Protein Interaction Networks
